DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Amendment, filed 7/2/04, with respect to claims 1-12 have been fully considered and are persuasive. The rejections of claims 1-12 has been withdrawn.

Reasons for Allowance

2. Claims 1-14 are allowed over the prior art of record.
3. The following is an Examiner's Statement of Reasons for Allowance: The current amendment corrected all the 112 issues.

The prior art of does not teach nor suggest the unique combination of: "wherein said image processing unit comprises: a first storage section which stores image data for an object to be image-processed; a second storage section in which a sequence of image processing are rewritably written; an image processing section which grabs image data for an object to be image-processed from said first storage section, and performs data processing by referring to the sequence of image processing and the data for image processing written in the second storage section; a third storage section which temporarily stores a sequence of image processing and data for image processing to be added or updated, that are transferred from an external microprocessor; and a transfer control section which transfers the sequence of image processing and data for image processing to be added or updated from said third storage section to said second storage section during idle cycle time that said image processing section does not execute image processing, and said transfer control
